To supply actionable salary data, outliers have been removed. This data is based on actual interview conversations with food and beverage industry employees across the USA, many of whom were recruited and submitted as candidates for job openings at Kinsa's client employers.

## Competitive Recruitment Insights for 2024

Kinsa Group specializes in executive recruitment, concentrating exclusively on sourcing professional talent within the food and beverage sector. We help you set the table for greater growth.

Since our establishment in 1985, our Recruiters have interviewed tens of thousands of candidates. Over the past two decades alone, we have successfully placed over 1,250 professionals and executives across North America and internationally.

Looking forward, the trajectory of technology continues to progress rapidly. In 2024, we anticipate that Artificial Intelligence (Al) will further revolutionize the hiring process for both employers and job candidates. How might this transformation impact your company's approach to recruitment?

Implementing AI can streamline your hiring process, expediting the screening of applicants. Unqualified candidates will receive prompt responses, while qualified individuals will swiftly progress to interviews with decision-makers. Consequently, employers can fill vacancies more efficiently.

Al integration fosters impartiality in candidate selection, as it does not consider factors such as gender, race, age, or other protected statuses. Moreover, AI enhances your capacity to pinpoint and address bottlenecks in the hiring process, and to discern the origins of your most successful hires. This insight empowers you to allocate your recruiting budget effectively.

Interpersonal skills and cultural fit will remain crucial for leadership positions in the food and beverage industry, and only human evaluators can accurately assess these traits. However, technology can still play a valuable role by facilitating video interviews with hiring teams, thus circumventing scheduling conflicts and delays.

At Kinsa Group, we're committed to staying at the forefront of industry trends and technology to better serve our clients. As you navigate the evolving landscape of recruitment, remember that our team is here to support you. Let's embrace the future together and continue to drive successful hiring in the food and beverage industry.

## Other Factors That MUST Be Considered

Base salary is only one factor in a total compensation offer. Job satisfaction, location, work-life balance, supervisor, teammates, and work environment must also be considered.

Holiday pay, vacation pay, personal and sick days are something every job seeker considers before accepting new employment. Even if you are hiring entry-level, you should expect to offer at least 3 weeks of paid time off in addition to the 6 major US holidays.

## REMOTE WORK

 OPTION / FLEXIBILITYRoles with work-life balance are important to today's job seeker. Remote and hybrid work will continue to be a part of food and beverage industry career options as the talented professionals you are looking to hire consider flexible schedules more favorably.

## EQUITY

Offering equity in the company is critical for senior-level positions if your company is a start-up, still in its infancy, or private-equity owned. Equity offering varies greatly and may be awarded annually or vested over time.

## BENEFITS

The increase in healthcare costs nationwide has made group medical benefits a significant perk for employers to attract talent. Let candidates know if you cover $80-100 \%$ of employee or family premiums. 401(k) employer match is also well worth mentioning in an overall compensation package offer.

Offering a bonus, based on company and/or personal performance, is the expected norm with Manager and Executive-level positions as well as for revenue-generating positions like Sales, R\&D and Marketing. The more impact a professional has on the bottom line, the higher the bonus percentage expected. An average bonus range you should consider offering is $10 \%$ to $30 \%$ of base salary. For business development roles, a \% of new sales as commission is best practice.

## How to Use This Salary Data

Over the last two years, Kinsa has collected salary data from more than 8,000 candidate interviews across several categories and skill sets in the food industry. We always share this complimentary salary data with our client employers when launching new recruitment campaigns for their open jobs. We have compiled a confidential summary of that salary data in Kinsa Group's 2024 Food \& Beverage Salary Guide in the pages that follow.

Kinsa Group's Salary Guide release for 2024 highlights both salary range and median base salary compensation for several job titles in the food and beverage industry. The data may be used by both employers and job seekers to gauge current market salaries and evaluate pay trends.

## Kinsa's Recruiters Advise:

V Location has a bearing on which end of the salary range you need to be in to attract top performing talent. If the job is located where the cost of living is high, you'll need to be above the median and trending toward the high end of the range. If you need to relocate someone, you may need to incentivize that with a more attractive base salary offer.

- Are you hiring a unique talent with specialty skills that are in high-demand? You may need to move quickly and bump up the base salary to beat your competition with an irresistible offer.
- Are you hiring like-for-like or are you willing-to-train? You may be able to get someone on the low end of the range if you'll consider hiring someone with the skills and experience one-step below your job title and offer them the promotional opportunity at your company.

V Otherwise, Kinsa recommends that you budget for the Median + 10\% range to attract the average candidate.

V Expect to negotiate. You will likely receive a counter from your candidate of choice, don't get defensive, this is the norm. Most candidates seek at least a $10 \%$ increase above their current pay.

## C-Suite Executive

| Position Title | Low | Median | High |
| :--- | :--- | :--- | :--- |
| Chief Executive Officer / CEO | $\$ 150,000$ | $\$ 250,000$ | $\$ 450,000$ |
